Technical Skills

HTML	MongoDB	TypeScript
CSS	ExpressJS	SQL
JavaScript(ES6)	ReactJS	

Professional Experience

SISDESA

March 2023 - Actual

Full Stack Developer

I am responsible for designing and developing comprehensive technological solutions. This entails handling frontend development, creating intuitive and appealing user interfaces, as well as managing backend tasks, including database management and server logic, to ensure smooth and efficient application functionality. My role involves close collaboration with cross-functional teams to ensure the successful delivery of innovative and high-quality projects.

The Moon Skincare

2021 - Actual

CEO

Founded a skincare product business and successfully networked to obtain highly sought-after products at competitive prices, allowing me to outperform my competitors for a considerable period of time. I created Instagram and Facebook pages and taught myself to use Facebook Business Manager to create effective ads. I also formulated the company's vision, goals, and objectives to guide its growth.

Freya CBD

2020 - 2022

CEO

I founded and managed a CBD business for both humans and pets, which involved developing the brand, labels, dropper, and distribution channels for the products. I also established contacts with expert chemists in oil production to ensure the quality of my products. During the process, I created an informative webpage using WordPress, utilizing a plugin called Elementor, to provide instructions for using my products. I purchased my domain through Siteground along with hosting services. The webpage also included a QR code on the dropper label that directed customers to the instructions section on my website.
